Technology Center 2600

Sir:

Preliminary to examination, please amend the above-identified application as follows:

IN THE CLAIMS:

[Please add new claims 3-52 as follows.]

Sub C17  
3. (New) A mobile communication device for communicating with a server over a communication network to receive position-related information, comprising:  
a receiver configured to receive position signals;  
a processor coupled to said receiver and responsive to the position signals to determine position information indicative of a present position of the mobile communication device;  
an input device configured to receive from an operator a selection signal indicative of a topic of interest; and  
a modulator/demodulator configured to transmit the position information and the selection
